

## Explaining the difference between Ortho 1 & Ortho 2

Ortho 1 Material	Ortho 2 Material
Ortho 1 is a molded material that comes in a sheet form. The cells are tightly joined together.	Ortho 2 is an extruded material that comes in the form of a roll. The cells are not as tightly joined together as the Ortho 1 Material.
Ortho 1 has an “Antimicrobial” additive in the compound of the mat. This is to help prevent, mold, mildew, fungus, or any food borne illness.	Ortho 2 does not have the “Antimicrobial” added into the compound. This mat is mostly used for Industrial Applications.
Ortho 1 is available in black, gray, or terra cotta. Black and gray are available smooth or textured top. Ortho 1 is offered with or without holes.	Ortho 2 is only available in black with a textured top and bottom. Ortho 2 is offered with or without holes..

### Ortho 1 and Ortho 2 Beveling

*We offer a 45° degree bevel for Ortho 1 and Ortho 2 Mats. Unless otherwise specified all mats will come with a bevel. If the customer does not want a bevel, please specify (90° degree bevel means **NO BEVEL**).*

Ortho 1 42” material will have a bond every six (6) feet or at the width when over the standard 42” is required. 36” runners will have a bond every five (5) feet.	Ortho 2 material can be a continuous run in our standard 2 ft, 3 ft, and 4 ft widths up to 75 feet without the need for a bond.
Ortho 1 warranty is 2 years. Life Expectancy for the Ortho 1 is about 3-8 years.	Ortho 2 warranty is 18 months. Life expectancy for the Ortho 2 is 3-5 years.

### Ortho 1 and Ortho 2 With Yellow Safety Stripes

*We offer 3” yellow safety stripes for either material. The yellow strip is not a painted on process but are bonded on to the mats. The red safety strip has been discontinued due to OSHA’s requirements for yellow.*

Ortho 1 mats are approximate in size + or - to 1”. Sponge products are not zero tolerance materials due to expansion and contraction.	Ortho 2 mats are approximate in size + or - to 1”. Sponge products are not zero tolerance materials due to expansion and contraction.
Ortho 1 material has an original aggressive top and bottom for wet or oily areas.	Ortho 2 material has only an aggressive top and bottom for wet and oily areas.

**All Ortho 1 Material and Ortho 2 Material  
Are non-allergenic, latex and silicone free.**
